STATE LAWS

Minnesota

- Offers a **medical marijuana** registration program for patients with qualifying medical conditions.
- As of **July 1, 2022**, Minnesota enacted a law which allows small amounts of **hemp-derived THC products** in food and beverages.
 - This does not equate to legal recreational marijuana because the law permits the use of **TCH that is derived from hemp**, not the marijuana plant
- Legal, recreational marijuana may be on its way.

MARIJUANA AND THE ADA

The **Americans with Disabilities Act (ADA)** requires employers to make reasonable accommodations for qualified workers with disabilities. The act does not protect illegal drug use, though it does afford some protections for recovering addicts. Marijuana is an illegal drug under federal law, with no exceptions for medicinal use, so its use is not protected under the ADA.

MARIJUANA AND THE ADA

In 2012, the 9th U.S. Circuit Court of Appeals held in *James v. City of Costa Mesa* that although the plaintiffs were "gravely ill," and California legalized medical marijuana use, the ADA did not protect the plaintiffs' use of the drug. The court said that the plain language of the ADA only protects drug treatments prescribed by health care professionals when those drugs are not explicitly banned by the federal **Controlled Substances Act**, like marijuana is.
